1 Delivery of Vehicle

1.1 PDI

Pre-delivery inspection has been performed on the vehicle described in the Warranty of this Manual in accordance with the specifications of GAC Motor Co.,Ltd. For the details, ask your dealer for the PDI Checklist.

Date of Check:

Checked by:

Dealer (Signature):

1.2 Delivery of Vehicle

The GAC Motor dealer will perform comprehensive inspection and clean to the vehicle before delivery, and give you the PDI Checklist for your confirmation and signature.

If you are unsatisfied with your vehicle conditions at the delivery, inform your dealer and ask your dealer for readjustment.

When you accept the vehicle, be sure to check it for the First Maintenance Certificate and the Warranty Certificate. A vehicle without such certificates cannot enjoy the first free maintenance, and will not be covered by the warranty.

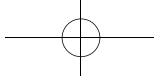

The following items come on with the vehicle.

2. Warranty Instructions

2 Warranty Instructions

2.1 Warranty Instructions

Implementation

Carried out by the GAC Motor dealers.

The GAC Motor dealers serve as the service and sales organizations in your area.

The dealers below are recommended by GAC Motor Co., LTD. to provide you service.

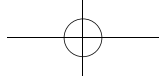

Dealer Name:_____

Address:_____

Post code:_____

Tel:_____

Fax:_____

Warranty Objects

The vehicles manufactured by GAC Motor and serviced by the authorized GAC Motor dealers.

Note

If your failed to fill in the Warranty Page and has no warranty registration, you will be not rewarded the with warranty rights of your vehicle.

The warranty should be applied to the next owner. (During the warranty period, if you sell your vehicle, the warranty is still valid for the next owner.)

Warranty Per iod

The Warranty Period refers to the indicated time or distance calculated from the date of purchase invoice issued by the dealer.

Basic warranty period of vehicle: 60 months or 150,000km (the first coming one prevails).

Warranty period of quick-wear and consumable parts:

Quality warranty period (whichever is earlier)	Quick-wear and Consumable Parts and Component
6 months / 10,000 km	Vehicle Battery, Remote Control Battery
3 months / 5,000 km	Air Filter, Oil Filter, Fuel Filter, A/C Filter, Bulb, Spark Plug, Fuse, and Tire
6 months / 5,000 km	Driving Belt, Friction Plate, Clutch Disc, Windshield Wiper, Brake Disc

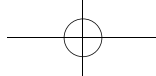

GAC Motor should provide free repair for any damage caused by any defect resulting from the quality of materials or manufacturing process.

During this period, if any defect occurs in your vehicle, the GAC Motor dealer will provide repair or replace the related parts according to the warranty conditions.

Warranty Coverage

The warranty responsibility of GAC Motor Co., LTD. is repairing the products, and the range of repair is including:

1. Repair or replacement of defective parts approved by GAC Motor Co., LTD.
2. Repair of defective body paint approved by GAC Motor Co., LTD.
3. Labour-hour costs required for the above corresponding repairs.

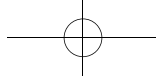

2. Warranty Instructions

Warranty Conditions

1. The GAC Motor dealers will consider the following factors which are not covered by the warranty:

- a) Driving your vehicle in a country or region other than the specified one.
- b) Using your vehicle as a taxi.
- c) Damage caused by the maintenance, repair and/or commissioning outside your dealer.
- d) Defects caused by using non-genuine parts, lubricants and/or liquids.
- e) Vehicle damage caused by negligence, error handling, any driving method other than that specified in the User's Manual or driving your vehicle beyond its limits (e.g., maximum load, seating capacity, etc.)
- f) Vehicle damage caused by corrosive or poor quality cleaning agents.
- g) Any modification, retrofitting, adjustment and/or removal without permission or prohibited in the User's Manual.
- h) Vehicle damage caused by non-ordinary use, error handling, negligence, driven by unqualified or unskilled drivers and/or used for competition (e.g., racing or rally, etc.)
- i) Feeling problems which do not affect the performance.
 - Any bad feeling which has no impact on the product quality, functionality or performance is not covered by the warranty.
- j) Any damage caused by improper storage or transport process.
- k) Any defect caused by natural disasters, fires, accidents and theft, as well as caused by their secondary damage.
- l) Any damage caused by the environmental conditions (e.g., industrial air pollution, compounds, bird droppings, sea-water salt or other corrosive substances) outside the control of GAC Motor.
- m) Any damage caused by time lapse (natural fading of painted surfaces, metal film peeling and other deterioration of plated surfaces).
- n) Corrosion and failure due to being all or partially submerged in water.
- o) Surface corrosion caused by uncontrollable flying stones or external scratches.

2. The general maintenance items, such as oil, filters and others, are not covered by the warranty.
3. The following incidental expenses are not covered by the warranty.

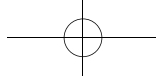

For example:

- Communication, mediation, meals, accommodation and other expenses caused by vehicle failure.
 - Any personal injury or property damage.
4. GAC Motor reserves the rights to decide the repair methods and the scope of application of the warranty.
 5. All the parts which have been replaced in the scope of the warranty work belong to the property of GAC Motor.
 6. Use the fuel, lubricant grease and liquids specified by GAC Motor.

 **Note**

To avoid controversy about the warranty responsibilities, pay attention to the following:

- Failure to have your dealer maintain check regular in accordance with the relevant requirements of the User's Manual and the Warranty Manual may cause controversy about the warranty responsibilities.
- When the vehicle fails, if you intend to destroy the original failure state, resulting in unidentified faults or fraud, and this may cause controversy about the warranty responsibilities.

2. Warranty Instructions

2.2 Owner's Responsibilities

1. Go to GAC Motor dealer and operate the first maintenance for the first 5,000km or 3 months (the first coming one prevails).
2. Be sure to have the GAC Motor dealer maintain and check your vehicle in accordance with the regular maintenance in this Manual.
3. Have the GAC Motor dealer check and repair any fault in your vehicle in time, which may be covered by the warranty.

Note

- Any maintenance and repair on your vehicle outside the GAC Motor dealers may cause disputes about the warranty responsibilities.
- If you do not have the first maintenance (for the first 5,000 km or 3 months, whichever comes first), the vehicle will not be rewarded with the first free maintenance.

Be sure to carry this Manual with you when you go to GAC Motor dealer.

2.3 GAC Motor Dealer's Responsibilities

GAC Motor dealer should fill in the warranty items in this Manual at the delivery and explain warranty procedures relate to GAC Motor to customer.

Fully explain to the user the importance of regular maintenance.

Any maintenance and repair, whether covered by the warranty or not, should be done in accordance with the standards of GAC Motor.

GAC Motor dealer should perform necessary repair or maintenance on your vehicle's damage or defects covered by the warranty.

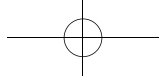

3. Maintenance Description

3.1 Agreement of First Maintenance

The first maintenance should be done within the first 5,000 km or 3 months (the first coming one prevails).

The first maintenance should be provided by GAC freely. Go to your authorized GAC Motor dealer to have first maintenance with this Manual. The first maintenance items include:

1. Replace the engine oil and the oil filter.
 2. Check and add:
 - a. Transmission lubricating oil
 - b. Coolant
 - c. Brake fluid
 3. Check:
 - a. Battery charging situation
 - b. Operating conditions of the parking brake and the brake pedal.
 - c. Transmission shaft dust boot for leakage or damage
 - d. Tightness of wheel fixing bolts
 - e. Wear and pressure in the tires /hubs (including the spare tire) (Replace if necessary)
 - f. Whether the steering tie rods are securely connected.
 - g. Conditions of under body.
 - h. Conditions of the suspension ball joints and dust boots.
 - i. Conditions under the suspension component
 - j. Windshield washer fluid (add it if necessary) / operating conditions of wiper or washer unit (adjust the nozzles if necessary).
 - k. Operating conditions of door checkers, fixing pins, door locks, engine hood /trunk hinge and lock catch
 - l. Operating conditions of the interior and exterior lighting appliances and electrical equipment
 - m. Thickness and wear of brake disc and brake lining
 - n. Headlight operating conditions
4. Clean
 - a. A/C filter element
 - b. Air filter
 - c. Front windshield water-groove drain hole
 5. Self-diagnosis: Query fault information with the professional diagnostic equipment

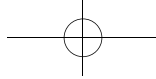

3. Maintenance Description

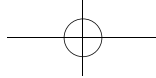

3.2 Regular maintenance

After checking, if necessary, operating follows the steps: add, wash, clean, adjust, lubricate, repair or replace.

Maintain the vehicle according to the specified mileage or interval (the first coming one prevails)	km x 1000	20	40	60	80	100	120	140	160	180	200
	Month	12	24	36	48	60	72	84	96	108	120
★ Replace engine oil	5,000km or 3 months1st time, every 10,000km or 6 months hereafter										
Replace the engine oil filter	5,000km or 3 months1st time, every 10,000km or 6 months hereafter										
Replace the spark plug*1	60,000 kilometers										
Check the auxiliary belt	20,000 kilometers										
Replace the auxiliary belt	60,000 kilometers										
Replace the fuel filter*2	10,000 km or 12 months										
Check and clean air filter	5,000 km or 3 months										
Clean the air filter cover	5,000 km or 3 months										
★ Replace the air filter element	10,000 km or 6 months										
Check the cooling system for leaks. If necessary, add coolant.	5,000 km or 3 months										
★ Replace engine coolant	2 years										
★ Check the transmission lubricating oil	5,000 km or 3 months										
★ Replace the transmission lubricating oil	60,000km 1st time, every 40,000km hereafter										
★ Replace PTO lubricant (apply to four-wheel drive model), rear differential reducer	Maintenance free										
★ Replace rear differential reducer lubricant (apply to four-wheel drive model)	5,000 km										
★ Check drive shaft connecting bolt and middle bearing bracket (apply to four-wheel model)	5,000 km or 3 months										

Maintain the vehicle according to the specified mileage or interval (the first coming one prevails)	km x 1000	20	40	60	80	100	120	140	160	180	200
	Month	12	24	36	48	60	72	84	96	108	120
Check the exhaust emissions (just check for leak, and check the exhaust during annual vehicle inspection.).	10,000 km or 6 months										
★ Replace the brake fluid		●		●		●		●		●	
Check parking brake, brake pedal (check function, free travel of pedal and parking brake)	5,000 km or 3 months										
Check the brake discs and brake linings (check the thickness and wear, and replace them if necessary)	5,000 km or 3 months										
Check the wheel nuts (Check and tighten to the specified torque.).	10,000 km or 6 months										
Check abrasion condition of tire and wheel hub (including spare tires). If necessary, change tire position and correct tire pressure.	5,000 km or 3 months										
Check the chassis bolts (Check and tighten to the specified torque.).	●	●	●	●	●	●	●	●	●	●	●
Check the brake system (check the brake fluid lines for leakage, and check the brake fluid level, if necessary, add it)	5,000 km or 3 months										
Check the steering tie rods. (Check their clearances and whether they are connected securely.)	●	●	●	●	●	●	●	●	●	●	●
Check the under body (checking the fuel pipe, brake fluid pipe and the protective layer of the bottom for damage, and checking the exhaust pipe for leakage or looseness).	5,000 km or 3 months										
Check the suspension ball joints and dust boots (Make sure there is no loose ball and no dust boot has oil leakage.).	●	●	●	●	●	●	●	●	●	●	●
Check the suspension component (Check the bushings for aging and damage. Check the torques of the bolts and nuts, and make sure the rods are free of deformation and cracks)	●	●	●	●	●	●	●	●	●	●	●
Check wiper/ cleaning unit (fill cleaning agent and check its function. If necessary, adjust injector).	5,000 km or 3 months										

3. Maintenance Description

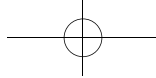

Maintain the vehicle according to the specified mileage or interval (the first coming one prevails)	km x 1000	20	40	60	80	100	120	140	160	180	200
	Month	12	24	36	48	60	72	84	96	108	120
Clean the front windshield water-groove drain hole.	10,000 km or 6 months										
Check door checker, fixing pin, door lock, hinges and buckles of engine hood/ trunk lid (check their functions and lubricate them).	10,000 km or 6 months										
Check the interior and exterior lighting appliances and electrical equipment.	5,000 km or 3 months										
Self-diagnostics (check the fault information with special diagnostic equipment.)	10,000 km or 6 months										
Check battery (use special tool to check battery condition, whether positive and negative cables are connected firmly and observe electric eye).	5,000 km or 3 months										
Check the headlights (check the lighting and adjust it if necessary.).	10,000 km or 6 months										
Check A/C filter element	10,000 km or 6 months										
Replace the A/C filter element	<div><div>●</div><div>●</div><div>●</div><div>●</div><div>●</div><div>●</div><div>●</div><div>●</div><div>●</div><div>●</div></div>										
Trial run (performance check)	Implement it after each maintenance										
Visually check the items below											
Transmission shaft dust boot (for leakage or damage)	5,000 km or 3 months										

★ : Actually check the amount of (engine oil, coolant, transmission lubricating oil and brake fluid) before each traveling.

*¹ : If your gasoline has impurities, the spark plug should be replaced frequently. If you find that the engine isn't stable at idle speed, immediately replace the spark plug.

*² : If your gasoline has impurities, the gasoline filter should be replaced frequently. If you find that the filter is blocked by impurities, immediately replace gasoline filter.

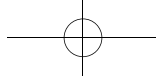

3.3 Additional Maintenance under Severe Conditions

The maintenance period is determined based on normal driving conditions. If you use your vehicle in one or several severe conditions, you should increase the maintenance frequency for some maintenance items, or shorten the maintenance period.

The following situations belong to severe conditions:

1. Frequently short-trip driving
2. Engine continued idle running or driving of stop-and-go driving (eg. taxi)
3. Driving in muddy, dusty regions or environment
4. Frequently trailer towing, driving with car-top luggage rack, or driving in mountainous conditions.
5. Frequently driving in extremely cold (below freezing point) or hot (over 35℃) conditions
6. Driving over 20,000 km per year, or often driving at high speed, etc

Item	Severe conditions	Maintenance requirements
Replace engine coolant	3, 5, 6	40,000 kilometers
Check the wheel fixed bolt	1, 2, 3, 4, 5, 6	5,000 km or 3 months
Check the chassis bolts (Check and tighten to the specified torque.).	1, 2, 3, 4, 5, 6	10,000 km or 6 months
Check the steering tie rods (Check their clearances and whether they are connected securely.)	1, 2, 3, 4, 5, 6	10,000 km or 6 months

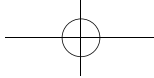

3. Maintenance Description

Check the suspension ball joints and dust boots (Make sure there is no loose ball and no dust boot has oil leakage.).	1, 2, 3, 4, 5, 6	10,000 km or 6 months
Check the suspension component (Check the bushings for aging and damage. Check the torques of the bolts and nuts, and make sure the rods are free of deformation and cracks)	1, 2, 3, 4, 5, 6	10,000 km or 6 months
A/C filter element	3, 5	10,000 kilometers

Increase the maintenance frequency of the air filter and the toothed-belt if driving your vehicle under severe conditions.
